Industry News

Kuniko reported the final assay results from its maiden drilling campaign at the Ertelien Nickel prospect. Among others, drill hole KNI_ER005 returned 4.8m @ 0.89% Ni, 0.43% Cu, 0.06% Co, 0.16g/t 3E and 4m @ 0.83% Ni, 0.45% Cu, 0.05% Co, 0.13g/t 3E. Following its maiden drilling at Ertelien, the company identified two mineralized domains, a primary, intrusion-hosted phase and a structurally emplaced zone in the footwall gneisses. Future work will focus on the intrusion-hosted mineralization as this domain demonstrates a more significant resource potential (KNI_ER001).

Industry News

Gemdale Gold announced the staking of new ground in SE Finland. The newly claimed Savo project covers a shear-hosted gold deposit with more than 25 000m of historical drilling and an inferred resource of 3.23Mt @ 2.7g/t Au for 276 000oz Au.

In addition, the company received final approval for the Nuotti and Perä exploration permits in the Hitura Nickel district as well as for the Isoneva 3 permit. At Nuotti, historic exploration work intersected PGE mineralization returning e.g. 15.6m @ 0.34% Cu, 0.13g/t Pt, 0.24g/t Pd from 17.3m and 12.1m @ 0.42% Cu, 0.34g/t Pt, 0.5g/t Pd from 49.3m in historical hole R307.
